

11. Why doesn't the woman play together?

- A. She doesn't like sports. B. She hates to stay in the sun. C. She doesn't want to lose.

12. What will she probably do later?

- A. Join the game. B. Have a picnic. C. Clean her shoes.

听第 9 段材料，回答第 13 至 16 题。

13. Why does the woman like visiting second-hand bookstores?

- A. The books are old and cheap.
B. She can find children's stories.
C. She's curious about old books.

14. What is the woman going to buy?

- A. A story book. B. A poetry book. C. A mystery.

15. Why does the woman want to buy the book?

- A. She likes the signature. B. She will use it as a gift. C. She thinks it has a value.

16. What does the man think of the book the woman chooses?

- A. It must bring her wealth. B. It is worth nothing. C. It isn't as good as his.

听第 10 段材料，回答第 17 至 20 题。

17. What should we do to start conversations?

- A. Smile at others. B. Have a proper topic. C. Feel good about ourselves.

18. What does the speaker think causes shyness?

- A. Thinking negatively. B. Believing in oneself. C. Looking in the mirror.

19. What does the speaker suggest we do to improve confidence?

- A. Do more reading. B. Talk a lot. C. Dress neatly.

20. What does the speaker mainly talk about?

- A. How to get over shyness.
B. How to develop self-image.
C. How to improve our appearance.

第二部分 阅读理解(共两节，满分 50 分)

第一节(共 15 小题；每小题 2.5 分，满分 37.5 分)

阅读下列短文，从每题所给的A、B、C 和 D 四个选项中，选出最佳选项，并在答题纸上将该项涂黑。

A

Island Lobster (龙虾) Company Open

Owners Katie and Thom Werner opened Island Lobster Company earlier this week. It's located on Peaks Island in the space formerly occupied by Peaks Island House.

The 64-seat establishment is a trap-to-table restaurant. The Werners are serving lobsters that they're trapped and hauled in with their own boat. You can see a copy of their menu on their website.

Coals Pizza Opens Today

Coals Pizza is scheduled to open today at 5 pm. Coals is located at 114 Preble Street in the former Portland & Rochester space. This is Coals' only location outside of New York. They specialize in grilled pizza. You can see their full menu online.

Luke's Lobster

The seafood spot, which will soft open for dinner on Wednesday, is a major milestone for the lobster company that first launched in Manhattan in 2009. Started by Cape Elizabeth native Luke Holden, Luke's Lobster debuted in New York City's East Village, and went on to make its mark in 10 cities across the U.S.— plus Japan and China.

Under Construction: Twist

A new food truck called Twist is under development. Twist is a collaboration between Melissa Lombardi, a former manager at Woodford F&B and Dan Zarin, the longtime writer of the Breakfast Serial column. Twist will be serving customized ice cream and shakes made to order.

21. What is special in Island Lobster Company?

- A. It is a milestone for the lobster company.
- B. It is the only location outside of New York.
- C. It serves freshly caught lobsters.
- D. It serves customized ice cream and shakes.

22. Where should you go if you want to have pizza?

- A. 114 Preble Street.
- B. Peaks Island.
- C. Portland & Rochester space.
- D. New York City's East Village.

23. Which restaurant has opened a branch in China?

- A. Island Lobster Company.
- B. Coals Pizza.
- C. Luke's Lobster.
- D. Twist.

B

I'm Jeff Logan, president of Logan Luxury Theaters Corporation. I'm very sorry to tell you many cinemas are at risk of closing permanently(永久). That's something we would hate to see happen.

Watching the newest box office movie and eating a big bucket of popcorn is an experience that many of us have enjoyed for a very long time. We all have fond memories of going to a theater of our first dates or the first movie we saw with our children. A movie theater is so important to the fabric of the local community. It's a place where we all gather, no matter what our interests, and no matter what ages, young and old, rich and poor.

But how much longer will classic theaters remain open? Just like other industries, movie theaters have been hit hard by the pandemic(流行病) and are going dark. The entire industry is being controlled by the pandemic, because the studios don't want to release their new movies until all the theaters can be open. As we all know, the theaters can't do well and can't get back to full 7-day a week at full speed operation without new movies to play.

Recently, the Logan Luxury 5 Cinema in Mitchell reopened for the weekends. However, like many theaters, it is only operating at about 10 percent capacity. Since opening, several new safety measures have been put in place. Block off every other row. People are asked to leave three seats between them and the next group. Staff spray the theater with disinfectant(消毒剂) after every show. And sanitizer stations can be found throughout the theater.

Even so, some people still aren't comfortable going to a movie theater yet. I fully understand that. Anyhow, I

just hope we must do something else to help out our local theaters, like taking part in a new national proposal called “Save Your Cinema.”

24. What does the underlined word "fabric" in paragraph 4 refer to?

- A. Typical feature.
- B. Basic structure.
- C. Public support.
- D. Common vision.

25. Why are the film studios unwilling to release the new movies?

- A. Cinemas don't operate normally.
- B. New movies aren't welcomed.
- C. People don't like going to cinema.
- D. Many cinemas go out of business.

26. What can we infer about the Logan Luxury 5 Cinema after its reopening?

- A. It makes a lot of money.
- B. It does well in disease prevention.
- C. It receives a large audience every day.
- D. It offers more enjoyable experience.

27. What is the purpose of this text?

- A. To share the good old days.
- B. To explain a social problem.
- C. To ask for people's help.
- D. To recommend a theater.

C

To move visual technology into the future, sometimes it helps to make a little noise. Researchers have used sound waves to produce floating 3-D images, create a sense of touch and even supply a soundtrack.

Since the 1940s, scientists have toyed with the concept of acoustic levitation(声悬浮), the use of soundwave vibrations to trap tiny things in midair. The technology has gained greater capabilities in the past decade. Some researchers believe this improvement could lead to applications such as contributing to novel 3-D printing methods, or creating displays that would be visible from any angle without requiring a screen.

Other researchers have also worked on visual displays that use acoustic levitation. In addition to visuals, the system can also produce audible noise to give the display a soundtrack. And the ultrasound speakers can also concentrate vibrations in one spot so that a finger might feel a sense pushing back—a little like the object shown by the floating image is really there. Soundwaves create a 3-D display!

Display without a screen is remarkably useful. It means that everybody in the room can see the image—any angle, location—and that's extremely helpful. As a communications system, such a display might one day allow users to chat with a 3-D projection(投影) of a person who can turn his or her head to follow as they move around a room.

The display will require a lot more work before you can install it in your living room, however. So far, this has been done in the research laboratory. We need to push it a little bit harder. We need to do more analysis to see if it would make sense to create a real display that people would have at home. The current system can only show simple graphics, such as a smiley face or figure eight, in real time.

Still, we are optimistic about the potential for this type of technology. If the system had only one speaker-covered surface instead of two, it could generate images that are bigger than the device itself. We can't make a TV image that's bigger than the TV — even a projector has to have a projection screen that's bigger than the image itself. But with a volumetric(容积的) display, a small, portable device might produce a much larger picture. We can imagine, in the future, having volumetric displays in watches, for example, that create large images that just project out of your watch.

28. From the first two paragraphs soundwave vibrations can be used to_____.
- A. catch very small objects in midair
B. develop 3-D printer's capabilities
C. replace a creative display screen
D. compose soundtracks by making no noise
29. What do we know about display without a screen?
- A. It has resulted in visual technology.
B. It is possible to see the image from any direction.
C. It is already ripe to create a real one at home.
D. It has yet to be tested in the research laboratory.
30. What does the last paragraph mainly talk about?
- A. Outlooks for the new technology.
B. Situations of the modern technology.
C. Praise for the cutting-edge technology.
D. Room for the technical improvement.
31. What can be a suitable title for the passage?
- A. Hearing Is Seeing—Sound Waves Create a 3-D Display
B. Seeing is Believing—3-D Printing Methods Arrive
C. Advancing Sense of Touch—3-D Images Float in the Air
D. Promoting TV Technology—Chat with 3-D Projections

D

One morning, when Gregor Samsa woke from troubled dreams, he found himself transformed in his bed into a horrible insect. He lay on his armor-like back, and if he lifted his head a little he could see his brown belly, slightly domed and divided by arches into stiff sections. The bedding was hardly able to cover it and seemed ready to slide off any moment. His many legs, pitifully thin compared with the size of the rest of him, waved about helplessly as he looked.

"What's happened to me?" he thought. It wasn't a dream. His room, a proper human room although a little too small, lay peacefully between its four familiar walls. A collection of textile samples lay spread out on the table—Samsa was a travelling salesman—and above it there hung a picture that he had recently cut out of an illustrated magazine and housed in a nice, gilded frame. It showed a lady fitted out with a fur hat and fur scarf who sat upright, raising a heavy fur muff (暖手筒) that covered the whole of her lower arm towards the viewer.

Gregor then turned to look out the window at the dull weather. Drops of rain could be heard hitting the window, which made him feel quite sad. "How about if I sleep a little bit longer and forget all this nonsense," he thought, but that was something he was unable to do because he was used to sleeping on his right, and in his present state couldn't get into that position. However hard he threw himself onto his right, he always rolled back to where he was. He must have tried it a hundred times, shut his eyes so that he wouldn't have to look at the floundering legs, and only stopped when he began to feel a mild, dull pain there that he had never felt before.

He thought, "What a heavy career it is that I've chosen! Travelling day in and day out. Doing business like this takes much more effort than doing your own business at home, and on top of that there's the curse of travelling, worries about making train connections, bad and irregular food, contact with different people all the time so that you can never get to know anyone or become friendly with them." He felt a slight *itch* up on his belly; pushed himself slowly up on his back towards the headboard so that he could lift his head better; found where the *itch* was, and saw that it was covered with lots of little white spots which he didn't know what to make of; and when he tried to feel the place with one of his legs he drew it quickly back because as soon as he touched it he was overcome by a cold tremble.

He slid back into his former position. “Getting up early all the time,” he thought, “it makes you stupid. You’ve got to get enough sleep. Other travelling salesmen live a life of luxury. For instance, whenever I go back to the guest house during the morning to copy out the contract, these gentlemen are always still sitting there eating their breakfasts. I ought to just try that with my boss; I’d get kicked out on the spot. But who knows, maybe that would be the best thing for me. If I didn’t have my parents to think about I’d have given in my notice a long time ago, I’d have gone up to the boss and told him just what I think, tell him everything I would, let him know just what I feel. He’d fall right off his desk! And it’s a funny sort of business to be sitting up there at your desk, talking down at your inferiors from up there, especially when you have to go right up close because the boss is hard of hearing. Well, there’s still some hope; once I’ve got the money together to pay off my parents’ debt to him—another five or six years I suppose—that’s definitely what I’ll do. That’s when I’ll make the big change.

First of all though, I’ve got to get up, my train leaves at five.”

32. According to the passage, Gregor initially believes his transformation is a ____.

- A. curse B. disease C. nightmare D. fraud

33. The author most likely includes a description of Gregor’s itch in paragraph 4 to ____.

- A. remind the reader that Gregor has already turned into an insect
B. stress the disconnection between Gregor’s thoughts and his actual situation
C. present important details about what Gregor’s new body looks like
D. show that Gregor’s thoughts are focused on the changes to his body

34. The passage most strongly suggests which of the following about Gregor’s attitude toward his profession?

- A. He is angry. B. He is eager to please.
C. He is depressed. D. He is diligent.

35. The main rhetorical (修辞的) effect of the final sentence of the excerpt (“First of all though, I’ve got to get up, my train leaves at five”) is to ____.

- A. provide a solution to the conflict Gregor faces
B. foretell the conflict between Gregor and his boss
C. illustrate Gregor’s flexibility and ability to move on
D. emphasize Gregor’s extreme sense of duty

第二节(共 5 小题; 每小题 2.5 分, 满分 12.5 分)

根据短文内容, 从短文后的选项中选出能填入空白处的最佳选项。选项中有两项为多余选项。

People have always had to find ways to keep food safe to eat. Methods to dry, smoke and salt food were invented thousands of years ago. 36. This storage method keeps food safe to eat for long periods of time. Today, canning is one of the most popular methods of storing food.

Clean fruits or vegetables are placed in glass bottles. The food can be put into the bottles either hot or cold. The cold method is used for soft fruits and vegetables that could lose their shape or taste. 37. They take up less space in the bottles.

After the food has been placed in glass bottles, boiling water is poured into the bottles to about three centimeters below the top. 38. The bottles are placed in a large container filled with warm water that is then brought to a boil.

The water must completely cover the bottles, from three to five centimeters over the top. When the water

boils, any air in the bottles will be expelled. The boiling continues for several minutes. Then the bottles are allowed to cool. Finally, they are placed briefly into cold water. 39. In other words, a vacuum(真空) is created.

When the bottles are completely cool, notes can be placed on them to identify what is inside. The bottles can then be stored in a cool, dark place at a temperature of between 4°C and 21°C.

40. It is also a good way to store food for six months to a year, or even several years, in case of an emergency. It does not cost much to continue canning every year once the equipment has been purchased.

- A. One popular method of canning uses a water bath.
- B. This makes a strong barrier to keep the air out.
- C. The process of canning is much more recent.
- D. Canning uses heat to kill bacteria that cause poisons to form in food.
- E. Then covers are placed on the bottles, but they are not turned all the way.
- F. Firmer fruits and most vegetables are usually cooked.
- G. Canning allows your family to enjoy foods that might not come fresh throughout the year.

第三部分 语言运用(共两节, 满分 30 分)

第一节 完形填空(共 15 小题; 每小题 1 分, 满分 15 分)

阅读下面短文, 从短文后各题所给的 A、B、C 和 D 四个选项中, 选出可以填入空白处的最佳选项, 并在答题纸上将该项涂黑。

Brenda Bongos was a girl with one big ambition--- to play the drums in a band. But a(n) 41 lay in her way. To be good enough to play in a band, Brenda had to practice a lot, but she lived next-door to lots of 42 people in a care home. The sound of beating drums would really annoy them.

Brenda was 43. She always tried to find a way of practicing her drums without bothering other people, but without success. However, 44 to practice as much as she could, Brenda tried all kinds of ways.

One day, while watching a science documentary, she heard that 45 cannot travel in space without air. At that moment, Brenda bongos decided to become a 46 astronaut.

So Brenda built a space bubble connected with a machine, which drew out all air. Inside was a 47 of drums. Once inside, Brenda 48 the machine and played like mad!

It wasn't long before she had become 49. Many people came to see her play in her space bubble. 50 afterwards she started giving concerts out of the bubble. 51, Brenda became a real musical astronaut as the government asked her to be part of a space journey, and had gone far beyond her first 52 of playing drums in a band.

When asked how she had 53 all this, she said, "If those old people next-door hadn't 54 so much to me, I wouldn't have gone to such 55 to find a solution, and none of this would have ever happened.

- | | | | |
|-------------------|--------------|---------------|---------------|
| 41. A. question | B. obstacle | C. figure | D. hand |
| 42. A. sick | B. local | C. elderly | D. poor |

| 55. A. classes | B. places | C. difficulties | D. lengths |

第二节 短文语法填空 (共 10 小题: 每小题 1.5 分, 满分 15 分)

阅读下面材料, 在空白处填入适当的内容(1 个单词)或括号内单词的正确形式。

The idea of a taxi that flies over a traffic jam and drops your home is an exciting proposal. It appears that we are almost there. German air-taxi startup Volocopter will build its first 56 (fly) taxi station by the end of this year in Singapore, paving the way for major changes, in 57 humans will commute in future. These air taxis or urban air mobility vehicles are usually 58 (electric) powered taxi based on drone(无人 机) technology 59 (design) to carry two people. The aim of the technology is 60 (save) people in time and helps it transform their transportation systems toward a more sustainable future by adding a new mobility option for citizens. Many companies including Uber 61 (compete) fiercely in this space now. Chinese automaker Geely led a round of investment worth 50 million Euros 62 will help the startup finance its commercialization in the next three years. Li shufu, chairman of Geely Holding, said: "Our latest work 63 Volocopter helps to build up our confidence in Volocopter air-taxis as the next 64 (ambition) step in our wider expansion in both electrification and new mobility services." It definitely still seems to be unusual, 65 at the same time, it is not completely unexpected," he added.

Still, practical problems remain unsolved, such as getting the go-ahead from regulators and ensuring the trips are as safe as many taxis will be flown without pilots.

第四部分 写作

第一节 应用文写作(满分 15 分)

66. 假如你是李华, 得知寒假江阴市政府在社区招募防疫志愿者。请你用英文写一封电子邮件应聘。内容包括:

1. 写信目的;
2. 个人优势;
3. 能做的事情。

注意: 1. 词数 80 左右 2. 可适当增加细节, 以使行文连贯。

Dear Sir / Madam,

第二节 读后续写 (满分 25 分)

67. 阅读下面短文, 根据其内容和所给段落进行续写, 使之构成一个完整的故事。

In 1989, fresh out of high school, I had the difficult task of choosing a career path before college started in three months. In those days in Pakistan, there were limited choices: becoming a doctor or an engineer, or entering the financial world after getting a business degree. I wasn't interested in engineering, so that I was left with medicine or business. I couldn't decide.

My uncle suggested that I do a work placement(实 习) to experience it for a month in an international company followed by a month in a hospital. After that, I could make a decision. It seemed like a good idea.

I was accepted for a month's placement at a foreign bank in Karachi. I got a feel for how the world of finance functioned, made new friends, and generally enjoyed the mostly easy-going work surroundings.

The month passed rapidly, and soon I began working at a leading hospital in Karachi. The experience couldn't have been more different. The hospital had a stressful environment. The days started early (at 7 am, compared to 9 am at the bank), and were filled with endless duties. And the night calls! This was crazy, working all day, through the night, and again the next day.

I began thinking about my two experiences. The bank had offered a more relaxing atmosphere, better working hours and less stress. The hospital was full of excitement, but the studying and training was difficult. It seemed that the business choice was going to win out.

Near the end of my month at the hospital, I was driving home after an especially busy night call. In front of me was a public bus, with college students sitting on the top. As the driver weaved through (穿梭) traffic, I could see the boys shaking from side to side.

注意:

1. 所续写短文的词数应为 150 左右;
2. 请按如下格式在答题卡的相应位置作答。

Paragraph 1:

Suddenly, a boy fell off the back of the bus. _____

Paragraph 2:

The next day, when I went to the hospital to see the boy, all his family got up, with grateful smiles on their faces. _____

高三年级第一次月考英语试卷答案

听力（共20小题；每小题1.5分，满分30分）：

1-5 ABCBC 6-10 ACACB 11-15 ABCBC 16-20 CBACA

阅读（共15小题；每小题2.5分，满分37.5分）：

A. CAC B. BABC C. ABAA D. CBAD

七选五（共5小题；每小题2.5分，满分12.5分）：

36-40 CFEBG

完形（共15小题；每小题1分，满分15分）：

41-45 BCDCB 46-50 BDACB 51-55 ACDAD

短文语法填空（共10小题；每小题1.5分，满分15分）：

作文

应用文写作（满分15分）：

Dear Sir / Madam,

I am Li Hua, a student currently studying in Nanjing Senior High. Knowing that volunteers are wanted to fight against the virus, I am writing to apply to be one of them.

As a warm-hearted boy, I am always willing to help people in need. Besides, my knowledge learned at school and my experience in the students union makes me well suited to the job. If chosen as a volunteer, I will use my medical knowledge to appeal to local people to raise awareness of self-protection, such as washing hands regularly and wearing masks when going out.

Thank you for taking my application into consideration.

Yours,

Li Hua

读后续写（满分25分）

Paragraph 1:

Suddenly, a boy fell off the back of the bus. He hit the road face down and rolled over. He lay still in the middle of the road as the bus sped away. None of the cars behind stopped. Thinking that he could die in a matter of minutes, I stopped my car and carefully examined the boy. With the help of some passers-by, I lifted the unconscious boy into the car and raced back to the hospital. After his family was contacted, and he was wheeled into emergency surgery, I drove home, exhausted but happy.

Paragraph 2:

The next day, when I went to the hospital to see the boy, all his family got up, with grateful smiles on their faces. What a feeling it was to help save the life of another person! I spent the rest of the day in a state of the most fabulous mood I had ever experienced. Driving home that evening, I decided on my career path. Two months of placements could not do what 30 minutes' helping an accident victim had done for me. This experience taught me that at times, the decisions are made for you—and that whatever happens is always for the best.

【分析】

本文是一篇读后续写作文，考查学生的读写能力。要求考生用150词写出接下来的两段。

【详解】

前文主要讲的是作者高中毕业后，面临职业选择的问题，先在银行做了一个月，之后再在一家医院工作的精力。在给的第一段开头中，“Suddenly, a boy fell off the back of the bus.”可推知，从公共汽车上摔下来，伤势必定很严重，再根据给的第二段开头中，“The next day, when I went to the hospital to see the boy, all his family got up, with grateful smiles on their faces.”第一段要说明作者是送小男孩去医院抢救，第二段要说明作者由此确定了自己的职业道路。
