As we all know, kites and kite-flying have a long history in China. A man named Gongshu Ban made the first kite more than 2,000 years ago. In Tang Dynasty, Chinese people started to celebrate the kite festival. But kites are also important in the US.

Kites were important tools in the US. American scientists have used kites for science experiments (实验). Benjamin Franklin, a famous scientist, used a kite to learn about electricity (电) in 1752. The Wright brothers used kites to test their ideas before they built the first airplane in 1903. When other scientists were trying to make a plane fly by itself, the Wright brothers thought people can “drive” a plane on the wind the way we fly a kite.

People in the US also like to fly kites for fun. Kite festivals have been popular at different times of the year. In California, people fly kites that can be bigger than a house. In New Jersey, **illuminated** kites are sent into the night sky so you can see them from far away even late at night. In the Louisiana Kite Night Flying, you can also see kites with LED lights on them.

The largest kite-flying festival in the US is the Washington State International Kite Festival. This week-long festival takes place each year during the third week of August at Long Beach, Washington. It invites famous kite flyers from around the world to show off their kites. They put on shows that are so wonderful that lots of kite lovers travel from around the world just to watch!
